

# RAINSHOW'R

## Introducing the New Bernoulli Power Shower

LOW FLOW — WITH HIGH PRESSURE

You know Rainshow'r for their quality and innovation when it comes to producing shower, bath and garden filters. Now Rainshow'r brings you the most innovative showerhead available, the Bernoulli shower head. Part of the Rainshow'r Signature Series of products.

### The Bernoulli Showerhead

- The first shower head specifically designed for use with a shower filter
- Italian-influenced design employs the scientifically recognized Bernoulli principle of pressure changes in fluids at increasing flow rates.
- Building this principle into the Bernoulli allows a very strong water spray combining air and water without the needle-like feeling of other shower heads.
- Solid brass, chrome plated showerhead crafted by American workers in the United States. It is also available with a stylish brass coupling for an attractive chrome and brass look.
- Fits all standard American plumbing. Conforms to U.S. Energy Policy Act—2.5 GPM at 80 psi
- First U.S. made fixed-action shower head introduced to the American market in over 20 years. Delivers at 2.5 GPM but feels like 5 GPM or more.
- Available in five finishes:
  - Chrome
  - Chrome and Brass
  - Brushed Brass
  - Brushed Nickel
  - Polished Brass
